Abstract

Humanity is in a permanent state development regard development technological field, although there are still deficiencies somewhere, we continue progress everyday become develop with world in order manage continue improve objectives.

Department IT study represents science used from people meet objectives everyday challenges simple person would find useful meet different challenges, whether example material need become perform or materialized refer some essential conditions. Only with modern technology adjust our days and also effort offers in stable periods time. We organise special events, we make institutions, organizations, agencies specialized in development, progress or protection human rights in digital area through application different projects, laws, participation in different events which objective address problems show ordinary population and with intention able apply special projects guarantee different everyday difficulties.

Key Words: state, human rights, security, IT department, cooperation

Summary.

Nowdays we live in continuous development, make right discuss information field is a challenge for state institutions therefore information which is develop in online media represents personal information wherether need protected, even if it is difficult research only for a limited number people.

Informative materials which are researched in online environment represent for everyone appropriate, useful, applicable also they represent connection with unknown, for example news, video or audio materials, public information for every student/children/teacher need take care about different agreements, projects, scientific projects.

In order develop progress with civilized world, we need inform ourselves from media everyday about events happen or it is elementary inform ourselves from online sources given fact about media institutions posted all news on official website includ reports from differents events where economic, educational, political, humanitarian or legislative issues are addressed.

Online resources offers a free encyclopedia with different information from special study depends on person's profile, level or degree education, age, gender, national affiliation or other objective receive what we develop.

Given fact that I am a student, I use right example means freedom personal information for development article, it was effective nowadays give different example useful national or international laws was only need an internet connection and personal laptop.

Keywords: international law, human rights, security, IT department, online

Introduction:

Organization population depends on every person offer through our own dedication or people guide others make lives all citizens developed through multidimensional organization different institutions, agencies, institution apply relevant legislation in different method would influence rights and obligations that every people make existence in existential conditions.

Constitution Republic Moldova, which represents one some important national law, includes all norms refer subject addressed, from example:

- a) art.23- right every person know his rights and obligation ;
- b) art.28 - personal, family and private life ;
- c) art.30- secret correspondence ;
- d) art.32 - freedom opinion and expression ;
- e) art.34 - right information.

Every citizen has rights, also second obligations, which are mention in national or international legislation. In addition, we make institution for apply different methods sanction so which no one is restricted from exercise their freedom manifest themselves in a special method therefore, we apply rights that are respected.

Information about personal life from every individual need become public only for public institutions or some restricted group people from example family, educational institution, employer, friends, governmental institution etc.

Nowdays online resources offers chance apply through different program with people from different parts world, cultural exchange, nationalities, ethnicity or spoken languages, so dialogue need personal, application personal number need become available only special persons who own program therefore this change a right from example secret correspondence at same time personal life for anyone who becomes known a large group people, possibly forbidden information about person's private life is make for everyone.

Every person expresses our opinions in different form communication, even in online resources, whether we interact with someone or develop different projects which we give public or saw reports in which someone expresses their proper opinion on a general subject.

Once right information apply from constitution and other national or international law represents respect human rights and freedoms apply at international and national level, probably didn't make representative useful usually become up to date with what is happen in group we work with everyday, information we received is a priority use at work, studies another organization make a final statement or issue a final decision on a special issue.

Special subject Human Rights settled in art.8 protection personal data from public institutions, this information need used for special purposes in interest some person concerned or on basis another reason provided for law.

Every person has right:

- informed about process his/her personal data ;
- connect to his/her personal data and
- request information, incorrect, inaccurate or incomplete personal data need modify, erased or restricted.

Therefore, some person represents a special presence, personal data are considered become limited read and special protection is applied from some example personal information refer to:

- 1) racial or ethnic origin;
- 2) political opinions;
- 3) religious or philosophical beliefs;
- 4) trade union member;
- 5) process health information;
- 6) biometric identification persons;
- 7) private life. etc

Every person need know about organized is a special institution agreement with protection personal data, National Center Personal Data Protection Republic Moldova, which take obligation monitor reclamation from all persons or other institutions, agencies personal data protection, intervention when necessary and examin petitions, protestation either didn't respect right protection personal data, apply sanctions when necessary, intervention with methods or means prevent and guarantee didn't give right protection personal data apply sanction written law.

Nowdays period we are going through, mention legislation Republic Moldova, sanctions are provided for prohibition protection personal information or some subject which organise management, use this data public persons or third parties, from example Criminal Code in Chapter XI, Special Part computer crimes and communication crimes, from art. 259-261¹ or from Contraventional Code Chapter XVI, art. 325,328,329,330⁴ or chapter XIX art. 365² unfounded

secrecy/declassification information, so we list some of them relevant at subject addressed in this article:

- 1) art.259 Criminal Code Republic Moldova illegal apply computerized information;
- 2) art.260⁵ and 260⁶ Criminal Code Republic Moldova - computer forgery/fraud;
- 3) art.261¹ Criminal Code Republic Moldova - Unauthorized apply to telecommunications networks and services;
- 4) art.325 Contraventional Code Republic Moldova - Divulgence data on security issue;
- 5) art.328 Contraventional Code Republic Moldova - didn't respect norms for stored, complete, record and used archival documents ;
- 6) art.330² Contraventional Code Republic Moldova - posted subject from secondary school and baccalaureate graduation exams, also solutions them ;
- 7) art.365² Contraventional Code Republic Moldova-unfounded secrecy/declassification information.

Although we apply a special organized institution from example Special Institution State Information Security from Republic Moldova invested from law and also apply well-known attributions in national legislation, which includes information security, special investigation services, spy methods, terrorist crimes or other extremist events against interests Republic Moldova and his citizen.

Apply art. 1 law about Security and Intelligence Service Republic Moldova, it is a special administrative institution, which is responsible for guarantee security Republic Moldova, defend constitutional order, contribute defense national economic system and guarantee state's defense capability, prevent terrorism and other threats state security, for this it plans events for purpose protect general human rights and freedoms.

Nowdays objective National Security Republic Moldova is mention in law no. 112 manifested through a system ideas which offer state's priorities in part national security for harmonious development population and centers in continuous development.

International partners is manifested one method secure through process integration in European Union, recognize issue belong Transnistrian territory an imminent threat territorial or informational security about Republic Moldova.

Nowdays degree neutrality organise for a region manifest one ideas apply at national security therefore Republic Moldova also protect sovereignty and independence, unity and indivisibility, become an inalienable territory.

Apply principal characteristics become some threat national security are:

- ✓ Transnistria ;
- ✓ Interethnic groups/organizations;
- ✓ International terrorism ;

- ✓ Misunderstandings between citizen
- ✓ Threats economic origin
- ✓ Threats information security ;
- ✓ Danger apply human, technologic system or natural disasters ;
- ✓ Organized crime and corruption, etc.

Nowdays Government apply national strategy in this field also economic, national, informational security, defense represents one important strategies institutions connect different international norms keep a friendly relations with all development partners from example United States of America, Romania or all member countries European Union for reform information security, a important field area development for every individual.

Conclusions

Nowdays security personal information is a obligation law enforcement institution. For this part, we organise general important international or national legislation which mention respect human rights and freedoms citizens Republic Moldova from challenge reason which they manifest.

In order refer this, strategies apply which provide threats integrity state at same time partners objectives with different states guarantee economic, educational, cultural, humanitarian or informational security.

Similar, we specialized institutions in this field information security from example Security Information Service, National Center Personal Data Protection, Parliament apply normative laws, Government apply them in practice or the Presidency organize different events/meetings/conferences with some important leaders from national institutions or law enforcement authority apply coercive sanction when rights person are forbidden.

So, for several years, Republic Moldova has objective become member state European Union, sign different agreements, demonstrate different partners with member state European Union in important fields ,become supported development partners from example Romania, personally I say which they represent strategies, with nothing implemented in practice in all the important part state's economy, keep its existence over time.

Personal data represents special information which need become organized apply a modern security system, demonstrate special responsibilities for all state institutions, inform citizen about dangers which everyday exposed develop different video/audio materials, meetings, events, etc.

Nowdays Republic Moldova aims apply at national security system based on a preferential legislative framework and well-established objectives, also through effective norms connected international/European system and highly qualified person who will perform their mention legislation period we are going through, manifest national security field our state, guarantee democratic process with an effect on state institutions and for his citizen.
